Minimally Invasive Vascular Center

Welcome to the Minimally Invasive Vascular Center™

www.MIVCMD.com

"We Focus On Your Circulation to Keep You Going"

Our Philosophy: Our philosophy is to provide Healthcare with a Heart. We offer a variety of Vascular and Endovascular Services to our patients. Our Lead Surgeon, Dr. Jeffery Dormu, is a Board Certified Surgeon. He is Fellowship Trained in Vascular, Thoracic and General Surgery.

Services Provided: Here at the MIVC, we diagnose and treat all diseases of the arteries, veins and lymphatic systems. **Vascular Surgeons are the only physicians treating vascular disease today who can provide all the treatment options available.**

Insurance Information: For the benefit of our patients, we are in network with several insurance carriers. Please check with your insurance company to ensure that we are in network with your plan. As part of our contract with your insurance company, we are legally required to collect any co-pays or deductibles at the time of service. **Please be prepared to pay your co-pay or deductible at the time of check in.** Patients who do not have insurance coverage will be expected to pay at the time of service.

Fees for Services: Fees for patient services vary depending on patient's disease process, and necessity for care as determined by a health care provider.

Financial Expectations: We expect our patients to maintain a good credit rating with our office. Failure to pay for medical services delivered in good faith may result in a patient being dismissed from the practice and their account to be turned over to an outside collection agency.

Compliance to Treatment Plan: Compliance with all appointments is critical to the quality of your treatment. Please make a courtesy call to our office in the event that you are unable to make your appointment. You are expected to follow the treatment plan outlined by your Physician, which includes making all appointments. Failure to do so can severely affect

your treatment outcome.

Please make a complete list of all medications that you are currently taking and bring it with you to your first visit. Be sure to complete all questionnaires as well as history and physical documents as thoroughly as possible. Your medical records are strictly confidential. The Health Information Portability and Accountability Act (HIPAA) restrict us from releasing any information without your written permission.

Thank you for allowing us to assist you with your health care needs.
